DETAILED ACTION

This Office action is responsive to communication received 08/30/2007 –
Amendment and Response.

Claims 1-4 have been canceled, as directed.

Claims 5-27 remain pending.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Specifically, this application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Group I, claim(s) 5-16 and 22-27, drawn to a golf putter.

Group II, claim(s) 17-21, drawn to a golf club shaft.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The Group I set of claims, specifically independent claims 5 and 22, do not include the corresponding technical features of the shaft as specifically required by independent claim 17. More specifically, independent claims 5 and 22 do not require that the mass of the shaft

Art Unit: 3711

divided by the length of the shaft is at least one hundred and seventy grams per meter of shaft in a shaft which is up to one meter long and at least one hundred and ninety grams per meter of shaft in a shaft which is longer than one meter.

The applicant must address claims 17-21, drawn to what would appear to be another invention, different from the invention that has already received an action on the merits. The applicant may appropriately amend these claims to depend from the claims of Group I, or simply cancel these claims.

A telephone interview was conducted on September 12, 2007 to discuss the above restriction requirement, but did not result in an election being made. See the Examiner Interview Summary, made of record 09/12/2007.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions

Art Unit: 3711

unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sebastiano Passaniti whose telephone number is 571-272-4413. The examiner can normally be reached on Monday through Friday (6:30AM - 3:00PM).
